“binoculars”

i need

binoculars

so i can

see

people

my

Nikon Trailblazers 8x25 ATB Binoculars

have shitty

close focus

so even

then

i probably

would have

been

fooled

hopefully i

can get

these

zeiss dialyts

on

shopgoodwill.com

then everything

will be

clearer

and i

wont be fooled

and i

wont be hurt
and i
wont doubt
what im
writing
and i
wont hide
my books
for
much
longer because
everyone will
see them
because
ill have
bought
everyone else
a pair
too

then maybe
theyll
want
to
be
around
me

“cameras”

photographs are
ghosts

ill just
say it
right
out the
gate

they
suck the soul
out of
a
moment

if were
outside and
having a
good
time or
a really
loving
romantic dinner for
valentines
dont
take out the
camera

it puts an
expiration
date on

the
whole
thing

“monocular”

how do

you

survive with

a

blind mind’s

eye?
